

Multimedia Learning Hub – Practice Exercises

Exercise 1 – HTML

Create a webpage with a heading, paragraph, image and audio player.

Exercise 2 – Video

Add an HTML5 video player with controls and a source file.

Exercise 3 – Navigation

Create links between index.html, audio.html, video.html, resources.html and about.html.

Exercise 4 – Semantic HTML

Build a page using header, nav, main, section and footer.

Exercise 5 – CSS

Create an external stylesheet and change the font, background, spacing and borders of your webpage.

Exercise 6 – Box Model

Create a content box and experiment with margin, border, padding and width.

Exercise 7 – Accessibility

Add useful alt text to images and make sure headings are used in a logical order.

Review Questions

1. What is multimedia?
2. Name five multimedia elements.
3. What is CSS?
4. Why is alt text important?
5. What is semantic HTML?
